

Dear FCC,

I am writing you to inform you and your constituents of my disapproval of the decision to challenge the 1st amendment rights of consumers and hinder the power of XM Radio. I feel we should be free to get our traffic and news from any source, newspaper, radio, Internet and now XM radio. The service provides a wide variety of music but entertainment, news, sports and now weather.

I work in the media / production realm and I am aware of the struggles associations such as NAB, RIAA and the MPAA are having with new found technologies that are growing but in this case there seems to be no gray area when it comes to legality and ownership the airwaves are a little more straightforward with it's nature, plus we are paying for a service we asked for, that is the American public.

In closing, I am supporting the rights of the people and XM radio for their free speech rights over the airwaves! No on petition 04-160.

Sincerely,

Kyle Soard
